

Utsav

Hi. I am Utsav Agarwal. I am a second year undergraduate student of the department of Electronics and Electrical Communication Engineering at IIT Kharagpur. My significant academic achievements are as follows (all are general category ranks):

KVPY SA: AIR 464

JEE Advanced: AIR 1187

JEE Mains: 99.66 percentile

WBJEE: AIR 48

I scored 91 out of 120 in Physics in JEE Advanced 2023. Before Class 10 Boards (in 2021), I had no idea of JEE preparation. Amit Sharma Sir, who was my only physics teacher during these 2 years of JEE preparation has a major contribution in it.

Although I was an above average student and a class topper in my school, I used to secure very less marks (almost lowest) in my initial days of preparation. None of the tests in my two years of preparation predicted under 10000 rank. The way Amit Sharma Sir taught me Physics not only made my concepts crystal clear but also made me fall in love with the subject. Unlike other teachers he focuses more on concept and learning rather than just rigorous problem solving without knowing the concept. He made us "feel" every concept that he taught. His knowledge and way of teaching Physics is just exemplary which helps me even now.

His teachings is not only limited to academia but also how to tackle the problems which we generally face during JEE preparation. He is such a teacher who will give you a constant dose of motivation in the most soothing way possible. Its because of him and his advice to focus on learning and not giving up that made me capable enough to secure such a rank. I dedicate my JEE rank and also my future academic achievements to him.

According to me he is the best Physics teacher you can find in Kolkata. He is no more a part of Fiitjee and runs his own classes with the name Grit Classes in Salt Lake.

Utsa

I am Utsa Ghosh I qualified JEE Advanced 2023 with a CRL Rank of 1242. I am grateful to my Physics faculty Amit Sharma sir who mentored me since the beginning of Class 12 till the day of JEE Advanced in my journey from being an ordinary student to qualifying JEE Advanced. The way he used to explain the concepts was really very helpful. He made us understand every theory related to any topic in a great way. He even taught some concepts which were not explained well in many books and this helped us in understanding the topic in great depth. The questions that he made us do in the classes were also very helpful in the final lap of the exam from revision view point. He also gave special focus in strengthening topics in which we either felt less confident or required practice. Above all, I feel that the way he used to guide us and motivate us was the most important factor in getting a decent rank in the JEE Advanced. Thanks Sir for all your constant efforts in making me achieve this rank.

JEE Advanced 2023

CRL 1242

Ujjawal

When I started preparing for JEE, the subject that I dreaded the most was physics and it almost felt like I had very little confidence in the subject and even when I was able to solve the questions I always felt underconfident. After the first phase test was taken I got a mere 9% in physics, but while I was reprimanded at home it was Amit sir who sat down with me and patiently explained to me where exactly I was committing mistakes. I was disappointed with my performance but chose to follow sir's advice and soon I was making slow but steady progress with my marks.

I soon started to develop an interest in the very subject of physics and it was Amit sir's pedagogy and interactive teaching style that helped me visualize concepts and intuitively solve questions that I was once afraid of. His classes were never boring and the questions that he gave us would always help me learn something new, not only did I get better at problem-solving but also got better at understanding the subject. When it came to chapters that were tough to visualize on a green board (like waves and electrostatics) he provided us extra video material to help with it.

He was also very prompt to solve our doubts and was very patient with us. Not only did he help us with studies but also debunked a lot of myths that we had about JEE and would always motivate us to continue putting hard work. Even during the lockdown he would make the class interesting and I never felt that his online teaching was in any way hindered due to the sudden change in mode of learning. As our exams approached he also took extra classes to further brush up our concepts and revise the syllabus.

Even when I got disappointing percentiles in the first two sessions of jee mains he still motivated me to study and due to his guidance and teaching I was able to get 99.54 percentile in physics in JEE mains, due to which my overall percentile shot up to 99.76.

I am very very thankful to Amit sir, without him I might have never gotten out of my fear of this subject.

-Ujjwal Shekhar

Susnata

I, Susnata Biswas, am currently pursuing Electrical engineering at IIT Kgp. I joined KOLKATA in class XI. Joining FIIT JEE helped me greatly in my achievement.

In my class XI, I repeatedly lose my interest in Physics for not getting proper guidance. So, It was quite natural that I did not crack KVPY SA this year. I am very much fortunate that in class XII, I had come guidance under Amit sir. His teaching methodology is excellent. The quality of illustrations taken in his classes are awesome and good enough to develop a good basic of every topic. He keeps class at ease with light humour and able to convey complex concepts effectively in a way easier to understand for students. The most important thing I have been benefited most is his personal care. I had to complete my backlogs of class XI physics along with class XI0049, which was a giant task. Amit sir personally took a special class in each week besides the FIITJEE weekend classes. I had regained my confidence in physics and have cleaned KVPY SX this year. After JEE Mains, COVID 19 pandemic made the situation worst to conduct IIT-JEE. So we had to maintain our patience and continue our studies without any distraction. In that extra 4 months Amit sir personally cared me and through WhatsApp and zoom app he cleared my doubt. This consistency helped me a lot. He sared me some PDF books, more test papers periodically as per my requirement .Not only in academic purpose, he also motivated me throughout my journey, more accurately during the lockdown period. I have successfully cleared IIT JEE 2020. I have ended up learning so much for him, thank you Amit sir

Surnata Bisma

Shayon

To Amit Sir

Sir, Thank you for being one of the special educators who will live on forever in my mind and heart. For the last one year you have been my mentor and guide. I am extremely grateful to you starting from electrostatic to the day before Advanced you have stood up for us. We have made irreplaceable memories. Finally thank you sir for putting in so much effort for us.

Sincerely

Shayon

(AIR-1366, JEE Advanced 2023)

Raman

I believe every teacher is not only a teacher but more than that But you had something very different from others. I never came across a teacher like you. Not only you had great sense of humor. you knew exactly how to control the class and understand each child in our class.

Starting from the below average students to the first boy of the class you had planning for everyone if I remember it correctly You always suggested to solve D.C Pandey for some and H.C. Verma package questions etc for the others.

You often used to motivate us to complete our short term goals to long terms goals. Many a times when you would teach us we used to get lost in the subject and lost track of time too. And the notes you gave us was a complete book the sums given by you covered each and every concept. Revising those sum always gave me confidence. You gave me a feeling like never before of utmost Satisfaction by solving problems and understanding the concepts.

Jokes apart once in a while I felt like I am living with physics and I loved it.

Sir you knew exactly what was important and what was basic you made sure that we learn them and practice them. I remember it now that you told us to practice the center of mass and moment of inertia and you always repeat basic before solving any problem which really helped us. And the way you taught us how to implement integration in physics and moreover how to integrate is something which I will never forget.

At last I will conclude by saying that to be with you is a feeling worth having experiencing. I felt somewhat privileged to get a teacher, a friend like. You told us on our frist day that a teacher only contributes 5% to a student suces but it was you only who proved that the number was much more than that figure.

Parijat

Hi, I am Parijat Sutradhar, a third-year undergraduate student in the Department of Mechanical Engineering at IIT Kharagpur. Along with clearing JEE Mains and Advanced, I also hold an achievement in the KVPY SX examination.

I had the privilege of being a part of Amit Sharma Sir's physics class when I began my journey in Class 12, a time when my confidence in my JEE preparation was at its lowest. After recovering from COVID towards the end of Class 11, I found myself struggling with a daunting pile of backlogs. However, Amit Sir's exceptional teaching provided me with a crystal-clear understanding of the Class 12 Physics syllabus and, more importantly, reignited my morale and motivation.

Under his guidance, I not only mastered Physics but also learned invaluable lessons beyond the confines of academia—lessons that were just as vital for excelling in JEE as the syllabus itself. His support and mentorship were instrumental in helping me succeed in the finale of JEE Advanced.

In my opinion, Amit Sir is not just the best Physics teacher I've ever had but also the best Physics teacher in Kolkata. I wholeheartedly wish him all the success in his new venture, GRIT Classes. I am confident that his institute will help many students achieve their dreams, just as he helped me achieve mine.

Malyadip

I am Malyadip Pal. I qualified JEE Advance 2023 with a CRL rank of 2967. I am very grateful to my physics faculty Amit Sharma Sir who mentored me since I got selected for CM batch in Class 11. From an ordinary student, he makes me an extraordinary student to qualify JEE Advance. Physics was my favorite subject since the beginning, and Amit sir makes it my strongest subject through his detailed analysis of each and every concept. His question practice session helped me a lot during the final lap of JEE Advance. Also he gave us practice sheet of every chapter which are very sufficient for JEE mains as well as Advanced. He also gave special focus on the topics in which we are less confident, gave doubt clearing sessions to clear our doubts. He also motivate us when we feel underconfident for the exam. Thanks Sir for all your constant efforts in making me achieve this rank.

Malyadip Pal
JEE ADVANCED
CRL->2967.

Bhoovan

Amit Sharma sir is one of the finest physics teachers in Kolkata. He has left an indelible impact on my life and it is because of his way of teaching and demeanor towards his students, physics became my favourite subject. He possesses an unparalleled passion for physics that truly is contagious. In addition to his exceptional teaching skills, sir always dedicated countless hours outside the classroom to provide extra resources and help those in need. In conclusion, Amit Sharma sir is undeniably the best physics teacher I ever had the privilege of learning from.

BITS PILANI, HYDERABAD CS & ECO

Agrim

Hi all, firstly a brief introduction about myself - I am Agrim Chaudhury, a 4th year student at IIT Kharagpur, pursuing my BTech in Mechanical Engineering with an Interdisciplinary Masters in Financial Engineering.

My JEE journey was unconventional to say the least - I wasn't even sure if I wanted to take science in the first place, let alone commence JEE prep. I struggled with all subjects almost equally at the onset but with time, came to appreciate Physics a lot more compared to the other two. Amit sir played an impeccable role in this - he handheld me where necessary and allowed me to figure out my own way when and where required. His style of teaching (which I realise in hindsight) was extremely well curated for JEE level Physics, given he built our fundamentals in such a manner that we could tackle any deviations/new derivative questions seamlessly.

As I progressed through the two years of JEE preparation, I slowly realized that the only way I stood a snowball's chance of making it to an IIT was by acing Physics - in this Amit sir helped me out immensely. During lockdown, he went beyond doing the "bare minimum" and took extra classes during afternoon to cater to our doubts.

As I understand, he has started his new venture - Grit. Based on my personal experience, I would highly recommend Amit sir as I feel he can be the mentor you need in your preparation journey. He certainly was in my case.

Abhradeep

Firstly, I will introduce myself. I am a pre-final year student at Department of Electronics and Electrical Communication Engineering at IIT Kharagpur. Here are my credentials:

JEE Advanced: AIR 1503 (General) - the highest rank from my school in the past 10-20 years.

JEE Main: AIR 3037 (General) - Scored 99+ percentile in all four attempts, with the highest being 99.735.

WBJEE: AIR 166 (General) - Took temporary admission in Jadavpur University (Electrical).

Board Exams: 98.5%.

My experience with my Physics teacher, Amit Sharma sir has been quite great. When I joined FIITJEE NORTH Kolkata he was my Physics teacher during 2019-2021. My predicted JEE Advanced rank was over 25,000 based on their admission test. However, due to his help, I achieved AIR 1503 in JEE Advanced.

Here's what made Amit Sharma Sir exceptional for me:

Outstanding Connection with Students: Amit Sharma sir made physics fun and easy to understand. He joked while drawing diagrams but explained solutions very clearly, step by step. He was patient and kind, answering every question, no matter how simple, without making anyone feel bad.

Comprehensive Syllabus Coverage: Amit Sharma sir focused on the kind of tough problems IITs include in JEE Advanced, like Rotational Mechanics or tricky ones from simpler chapters like Sound and Thermodynamics. He stayed on track, avoiding unnecessary topics that didn't help with preparation. He was clear and to the point, giving each chapter the right amount of time- never dragging it out or rushing through it.

Wide knowledge: Amit Sharma sir has deep knowledge of physics and keeps improving it every year. He studies advanced books in depth, far beyond what students typically need, to stay ready for any doubts and help us develop the critical thinking needed for JEE Advanced's tricky problems.

Overall, a good Human Being: If he was not my teacher, I would still want a persona like him to be my friend/mentor. This is a feeling which cannot be expressed by words and this was my exact feeling.

After I got into IIT, I came to know that he became the HOD of the Physics department at FIITJEE, a thing which did not surprise me at all because from the beginning I knew he deserved it. He had great dedication and passion for teaching. I still remember he used to take extra classes in the afternoon during the lockdown which helped me a lot in preparing. He used to give us notes for quick revision. He has truly been an inspiration for me.

Right now, he has left FIITJEE and is running his own classes named GRIT classes. You may contact him on 9836442104
